Are some of these favourable reviews a tad too enthusiastic? Are some of the negative ones a gnats' too critical?

There's only one way to find out. Play the games yourself in the Gamesmaster Zone.

You'll find one in every Comet store. A themed area where you can play before you pay on a selection of the latest and greatest titles.

(There are over 250 available in all.)

The Gamesmaster Zone is the biz when it comes to hardware too. With a huge stock of all the big names in hand holds and consoles.

Buy any of them and you'll qualify for a Gamesmaster Zone Discount Card. Valid till April next year it will cut the cost of  
**4**  
CHANNEL FOUR TELEVISION new games by 10%.

And hot new games is where the Gamesmaster Zone really has the edge. The day a title is out, is the day that title will be in.

And not just boxed behind the counter, but loaded up and ready to play in our demonstration units.

By now the doubting Thomases amongst you may be thinking we're telling a few wobbles ourselves.

Well Tom, check out the Gamesmaster Zone in your local Comet.

## COMPO Winners

A Switchstix is now on its way to every entrant who wrote in with a jingle for our compo in issue four. Here are a few odes to savour:

You want some cool arcade control?  
Get Switchstix on and you'll really roll.

If your control pad is feeling queasy  
Fit a Switchstix and make it easy.

Switchstix, Switchstix really great  
Feel the power and you will faint.

Megatastic, megadocious, whoopy do, whoopy do  
if you don't have a Switchstix you'll have to use a twig  
Ha ha ha, ha ha ha.

if you think that joypads are lame  
Then use these Switchstix to improve your game.

I've been fumbling in the dark  
Switchstix will give me extra spark.

When your joystick needs a wobble  
Use a Switchstix, it's a doddle.

There was a young man from Baghdad  
Whose Nintendo thumb was really quite bad  
They had blisters galore  
They made gaming too sore  
This made him feel totally sad  
But now there's a solution and cure  
its price will suit even the poor  
It's called a Switchstix  
To your Game Boy it's fixed  
It's a brilliant idea, that's for sure.

200 Castelian badges have just been popped in the post too.

**L**emmings has been acclaimed as the most innovative and successful game ever. The great news is that a Game Boy version is in production to be released by Ocean in February '93.

Dozens of lemmings march around the terrain doing what comes natural to them – following each other off cliff edges and into all sorts of peril.

As chief lemming you must dig tunnels, build bridges etc to save them from committing hara-kiri. More and more of your buddies enter the game, aimlessly moving towards disaster and increasing the pressure.

It's addictive, infuriating and the best fun you're ever likely to get out of a game. Watch out for a preview soon.

## Krusty's Fun House

**S**impsons mania has been one of the most enduring crazes thanks to fresh and highly original material. It seems games are being produced on every conceivable aspect of the cult cartoon series.

Krusty the Clown is Bart's favourite TV star and this 60 level game has a variety of puzzles based in Krusty's crazy funhouse with guest appearances from the likes of Homer, Corporal Punishment and Sideshow Mel, not to mention Bart of course who is the Trap Master.

Krusty's Funhouse is due for release in January '92, published by Acclaim LJN.

## Ship Ahoy!

How many F grades in exams have been a result of playing Battleships at the back of the classroom? From pen and paper to board-game to Game Boy game is a remarkable transition, but the principals of the game remain much the same.

You use the directional keys to place your fleet and then plot your missiles to sink your opponent's navy.

It's a shame there isn't going to be a two-player link-up option but it's well worth a look. Battleships will be released by Mindscape in December.

## The name's Pond... James Pond

As underwater agent James Pond he was licensed to gill and churn out a whole string of criminally unfunny fish related jokes and anecdotes.

A freak accident meant that he had to be rebuilt and James Pond became RoboCod! Now we can exclusively reveal that this mean, green and part machine super hero is to hit the Game Boy screen in early '93, published by Ocean.

In this epic adventure the evil Dr Maybe has taken over Father Christmas' toy factory and is producing toys with booby traps in them.

RoboCod must infiltrate the factory and thwart Maybe's despicable plans, fighting off the evil quack's minions and the crazed brain-washed toys.

With some ingenious features making Mario seem decidedly old hat, RoboCod promises to be a resounding hit next year!

## Carry on Carrying

Logic 3 have come up with a new carry case for your Game Boy. Although small in size, it can hold up to six games, cables and the all-important batteries.

Extra durable, the case also has added cushion protection. Now you can sit down with a Game Boy in your back pocket without ever worrying about the consequences.

Available from Spectravideo, this add-on costs a reasonable £10.99.

## The Clip-a-Boy is Here!

If you're rapidly running out of hands to carry all your Game Boy add-ons, here's a good way of relieving a finger or two. The Clip-a-Boy from Deekay UK clips onto your belt, enabling you to hang your Game Boy securely.

The hand held clicks into place and can be drawn out for action as quick as Clint Eastwood on his Smith and Wesson. A simple but effective idea, affordable at £4.99. Essential? Well, if your pocket money's burning a hole in your pocket...

## R-Type 2

A blast from the past, still standing the test of time and reducing its competitors to smithereens, is being updated by those clever chappies at BITS. Going by the hugely inspired title of R-Type 2 you, once again, take to the potentially deadly galactic vortexes. Boasting beautiful graphics and compelling gameplay, watch out for a preview next month.

## Ninja from the Nth Dimension

© 1992 Gremlin Graphics Software Ltd.

### Mario 2

**G**B Action presents you with the very first screenshots of Mario 2. With a myriad more levels to battle through, tougher and meaner nasties to beat, secret bonus rooms and a battery back-up enabling you to save your game, it's gonna be a goodie.

Mario will have a whole new range of acrobatic antics – spinning and twizzling in the air and soaring up in the clouds with his 'bunny' ears.

**I**f ever there was a game character designed to knock the likes of Mario and Sonic into the proverbial cocked hat, Zool is the one.

A weird aggressive looking character billed as 'a Ninja from the Nth dimension', Zool has been sent down to earth on a mission. What's awaiting our pint-sized hero is a furious platform environment in a bizarre series of weird and wacky venues ranging from a sweet factory to a treacherous underground lair.

Each level has different threats and difficulties related to the particular environment. On the Game Boy, it is one of the most varied and fast moving arcade romps ever produced.

The game is presently in the early stages of production but Zool is expected to be released in summer '93.

## 24 HANDY BOYS

The old Game Boy as fashion item is certainly prone to strange transformation but we think the Handy Boy wins first prize for the most spectacular metamorphosis.

Barely recognisable, looking like an assault craft from Star Wars, your Game Boy becomes a portable arcade machine, complete with joystick, quick fire buttons, bigger, magnified screen and stereo sound.

The Handy Boy is the ultimate Game Boy add-on. Courtesy of Spectravideo, we have 24 worth £29.99 to give away.

Here are some famous Andys. All you have to do is match each Andy with what they are best known for. If you think Andy Crane (a) is one half of pop duo Erasure (2), then write 2. a, and so on.

- a. Andy Crane
- b. Andy Williams
- c. Andy Pandy
- d. Andy Ridgley
- e. Andy Bell

**The Handy Boy is available from: Spectravideo, Unit 27, Northfield Ind Est, Beresford Ave, Wembley HA0 1NU. Tel: 081 902 2211.**

- 1. Ex Whamster who's a bit lost without his talented chum
- 2. High camp half of pop duo Erasure
- 3. Ageing American crooner

## 20 MARIO BIKE BLASTERS

The Mario Bike Blaster is just one of a diverse range of Mario merchandising. The biggest bike accessory since the Spooky Dokey, the Blaster is an electronic siren, fashioned in the shape of the chirpy Italian plumber's face.

It can emit any one of eight very loud 'biddly biddlyboom' and 'peewitpeewit noises'... or a startling crescendo of all eight if you keep the button pressed for long enough.

Launched this month by Creative Concepts, priced £9.99, we have 20 Mario Bike Blasters to give away. Simply answer these bikey horny-type questions.

**To obtain a Super Mario Bros bike blaster send a cheque or postal order for £9.99 inc p & p to: Creative Concept Development Ltd at PO Box 92, Reading, Berkshire RG4 7HX. Allow 28 days for delivery.**

1. What 16th century naval explorer is also a make of bike?
2. What old-fashioned bike with two very different size wheels was named after two coins?
3. What is the name of the annual bike race that always finishes in Paris?

## 10 HOLDERS

Let's face it. How could your life be truly fulfilled without these magnificent, rainbow coloured Game Boy cartridge holders from Buxtapes Unlimited, priced at £3.99 for a three pack and £5.99 for a five pack.

Simply insert your fragile cart in this robust box made from high clarity, durable translucent plastic to make it indestructable, impervious to light, shockproof and a lot more difficult to misplace.

If you want your fave games to last well into the next Ice Age, a sensible precaution would be to enter the compo. Simply match up these objects with the building/place that protects them from the environment.

1. garage
2. safe
3. hangar
4. stable

- a. aircraft
- b. horse
- c. car
- d. valuables

With my extended kitchen knife I slice a few heads and make a dash for the door but, by heck, it's locked and I've not yet found anything remotely looking like a key.

A few more head swipes later and I bolt out the other door to take a peek inside the adjacent room. Oh fabulous, there's oodles of extra hearts and power-ups to be scooped up here.

Through the next opening and, blimey, after all that I'm telewarped back to where I started! And that's just for tasters. The further in you venture, the more betwiddling it gets.

# GEORGE FOREMAN'S KO BOXING

*As the former heavyweight champ lends his muscle to the latest sports sim, are we in for a game of bruises and bloody noses, or has the veteran punching preacher been stitched up good and proper..?*

**P**ut a big name behind a licence and it automatically transmutes into a big bucks game. Right? Well, that's what publishers would sometimes like to think, by-passing the fact that glamping up a title does nothing to

the entertainment value if gameplay is left to wilt.

Beat'em-up elements feature in most platform and arcade-based games. Therefore, a prerequisite of a title concentrating solely on the jab 'n' punch approach is that it exhibits a definite edge.

Unfortunately George Foreman's

**Lily-livered punches lacking in soul.**

KO Boxing lacks those special tactical moves, exhilaration and downright thuggish behaviour to help it flourish.

Your aim, as big George, is to defeat all the world ranked Heavyweight contenders, of which there are nine, in a bid to win all three Championship belts and subsequently progress to become the holder of the Heavyweight World title.

Four knockdowns in a round will

**JAB! RUMBLE!** The seasoned boxers let their fists do the talking

win a bout, enabling you to move onto the next pectoral blocking your view.

A password system removes the tediousness of starting from scratch every time you play.

With an over-the-shoulder perspective, George's punches and crosses are controlled via the 'A' and 'B' buttons and the directional pad.

## You Got Lucky

Sadly, actual body movement is kept to a bare minimum, so much so that it produces a false sense of security.

In fact, the pace is more akin to an over fifties synchronised swimming class - lots of shoulder wiggles and floppy arm movements - rather than a full scale wager.

At least you could say that

George's in-ring presence has been accurately transcribed. There he stands, a solid lump of flesh, rejecting the Fred Astaire flighty feet approach.

Suddenly he gets annoyed and - wham! - with a flex of the wrists and a heavy hand, the opponent's out cold.

A few victorious pelvic thrusts later, a glance at the punchstats screen showing how many punches have been thrown and landed, and it's back to bone crunching antics.

The fighters are well animated, yet the practically obsolete detail and minimal spot sound effects only serve to cripple their impact.

Furthermore, duckin' and divin' is limited to a fractional movement or two to the left or right, only really using the bottom half of the screen.

To lift the game from its dormant stage maybe Mr Foreman should adopt the all-singing, all-dancing approach and throw in his gloves for a ukele. All together now, 'When I'm cleaning windows!'

A game revolving around fisticuffs is never really an eye-catcher, but even those with a taste for fighting sims will find the lily-livered punches on display to be lacking in soul. Is the king of comebacks destined to end up on the has-been heap?

Word Zap involves as much or as little brain flexing, panicky activity and buzz as you wish.

Unless in a link-up game the computer acts as the opponent and it becomes a race against time as to who can come up with a set of seven words the first.

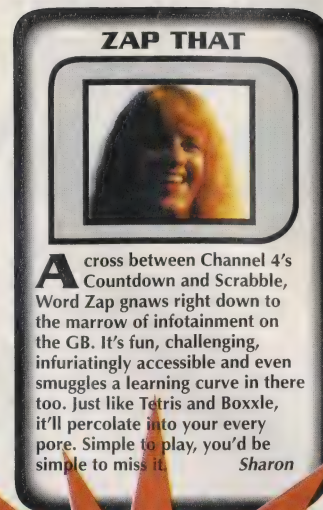

Should you both telecommunicate and produce the same combinations then, ZAP! the word is exterminated and both sides rethink.

To twizzle your mind even further, an option exists whereby only the letters positioned at either side of the one you've chosen are free to be used next. If you don't want to be left with an impossible combination such as a K an X and a W, think carefully.

Word Hai is the name of the other game in the cart. This involves making seven three letter words out of a selection of 21 letters.

Once done there should be no letters left out and no misconstrued words. If so, then just mess vowels around to make the odd one out fit.

Again this can be played as a challenge, timed or otherwise and with a hint option too. And again, the next letter to be selected depends on what's just gone before.

The cold, steel and granite arena of the future sport - Speedball

*The heavy steel ball thudded into the glove, near wrenching the shoulder from its socket. "JONATHON... JONATHON", the crowd chanted! Blinded by blood, sweat, a searing pain, Jonathon picked his way through the scattered injured and launched the projectile... CrrRang!*

# SPEED BALL

**A** series of near-future novels and movies in the '70s and '80s had a profound affect on the all too fertile imaginations of certain adolescents of the time.

The likes of Ultimate Warrior, Omega Man, Logan's Run, Blade Runner, Escape From New York and also Rollerball provided the stimulus for many of the games that we play today.

One of the greatest future-prediction statements from the

software design fraternity was the superb 'future-sport' game, Speedball 2, designed and produced by the Bitmap Brothers.

Inspired by Rollerball, this future-sport was a chart-busting smash on the 16-bit.

Now this superb production has been pumped into the Game Boy,

**This game truly is Brutal Deluxe in almost every sense.**

courtesy of top designers Spidersoft.

The brief was to produce an exact hand held version of the game... nothing less would do.

Technically, Speedball 2 is advanced, even by today's standards, boasting features that would seem unfeasible on the Game Boy.

Miraculously, the conversion survives pretty much intact. Spidersoft approached the project through a process of physical all-round size reduction.

## Inspired

Fortunately, the great definition of the sprites and solid coding meant that the graphics and background detail in the Game Boy version have retained much of the clarity.

In relation to size, the scroll pace is unmarred by jerkiness and interruption.

The original artist Bitmap Brother Dan Malone was inspired by the characterizations in the cult comic

## BRUTAL

**A**nyone who has seen the heavy production of Speedball 2 would be doubtful that this Bitmap classic could survive the drastic reduction to the GB arena. But sacrifices have been intelligently selected to preserve the true essence of the original game. Despite the lack of the two-player option, this is a true hand held version. Jason

GBA 20  
NOV '92

**It's the goals that count. The Brutal Deluxe team piles on the pressure.**

**Even in considerably reduced circumstances a good deal of graphic definition remains**

A gym section corresponds to the management responsibilities with the fitness and general attributes being a crucial issue.

### Pep Talk

In the gym, you can concentrate on a single troublesome area of an individual player, or implement an overall change to the whole team.

The arena... a cold, grey, granite and steel world, hosts a minimum rule free-for-all game. The objective is to get the ball, go for goal and let nothing, NOTHING get in your way!

The steel ball is ejected from the centre of the arena and the joystick controls the nearest man to it.

Tapping and releasing the 'A' key throws the ball. Meanwhile, when the opposition has the ball, a timely tap of the 'A' button affects an aggressive slide-tackle designed to send the enemy reeling.

During the course of this furore they call sport, certain icons appear which relate to identifying each player's in-built attributes such as attack, tackle or defend and marking the player in possession of the ball.

**Speedball may be the danger sport of the future, but research shows that today's sport is prone to injury. In England and Wales alone, there's 29 million sport injuries costing £60,000,000 in treatment!**

2000 AD and the spirit and atmosphere of his creations survive the transition to the little screen.

Speedball 2 is a combination of brutal, non-stop action in the arena, with team management and coaching being a fundamental aspect of performance in this competitive sport.

As manager of the team named Brutal Deluxe, the objective is to strengthen a squad of 12, which comprises of nine players and three substitutes.

This is achieved by referring to league and player statistics and using this information to sell, buy and condition players.

**The steel ball is spat into the arena. Gain the initiative and seek to maim the enemy**

### SWEATY THRILLS

**S**peedball 2 has always been one of my favourite games on the Amiga. I approached this conversion with some caution, but I was surprised by how impressive everything looked. It's also dead simple to play, just like the original in fact. The main, and only, problem I encountered was I couldn't tell the difference in the team colours!

Andy

Other icons relate to specific point and bonus opportunities; score multiplier and Electro Ball which stuns the player to come in contact with it.

The 16-bit original boasted two-player games and this is sadly missed in the Game Boy version.

However, the folks at Spidersoft have sweated more than a few buckets perfecting the computer intelligence to offer competition to players of all levels.

Control is responsive on all fronts as you manipulate the squad, pass and go for goal. Amazingly, the non-stop action feel of the game has been faithfully translated.

Whether you're aiming for the league championship or just fancy a dirty brawl or two, this game truly is Brutal Deluxe in almost every sense of the word.

## AWESOME

**X**enon 2 hits the Game Boy screen with all the conviction of a blast of Nashwan power. This original cast-iron production has made the journey to the little screen with ease. Behind the scenes, designers Teeny Weeny's efforts have been tireless in their execution of this quite complex conversion. An emphatic success. *Jason*

**T**he shoot'em-up has always been one of the most prolific themes of true arcade entertainment. However, three years ago, fad-conscious game fans grew somewhat tired of the relentless scroll 'n' shoot alien bashes.

They took to the roads in rear-view race games such as Out Run and Chase HQ. But the Bitmap Brothers were determined to see their dream through to fruition – a sequel to the hit alien blaster, Xenon!

The Bitmaps researched into why the shoot'em-up had become so hackneyed and predictable. They came up with some stunning features and effects which turned Xenon 2 into the blast that all other shoot'em-ups would be compared with.

# XENON

***Xenon 2 on the Game Boy? The Bitmap Brothers' blast deluxe on the little screen? You're pulling my pud! With its fist-sized aliens, devastating weaponry and explosive effects, how could this blast be squashed into the little screen?***

TM & © Mindscape

**Massive background graphics scroll smoothly with hardly a glitch or murmur of complaint on the Game Boy screen**

Xenon 2 single-handedly revitalized the trade in alien ass-kicking, cracking the flabby and predictable shoot'em-up mould with a 24 pound steel sledge-hammer.

## Breaking the Mould

What made this game a blast meister's delight was the spectacular effects, and that's what makes a convincing Game Boy conversion seem even more improbable.

However, the small but perfectly formed design team, Teeny Weeny Games, ignored the odds and never

shirked from its obligation to produce a believable hand held version of this blast deluxe.

A whispy sprinkling of Bomb the Bass' Hip Hop on Precinct 13 is emitted from the dinky GB speaker.

Just as the gulf between a stereo, full-colour monitor and an LCD display hand held unit is all too obvious, so is the daunting task of producing a faithful conversion.

Reminiscent of the original, the Game Boy scroll routine is set at a somnolent pace which draws you into a dangerously false sense of security. It contrasts unnervingly with a frenetic yet constant and unpredictable enemy attack.

The Bitmaps turned to the old 'Natural History Encyclopedia' to find enemies, and discovered some gruesome looking beasts which shaped Earth's evolution.

Xenon 2 has you blasting the guts from the very beginning of time and on to man's future technology.

At first the 'assault craft', for want

of a better phrase, is stripped to the bare metal, with a simple, single-shot fore-mounted cannon.

## Blast of the Past

Fortunately, the first waves of attack are tentative, allowing you to really get to grips with both the joystick controls and the weaponry.

This honeymoon period is short-lived though as the ingenious attack patterns are designed to commit you, tax you, beguile, then bludgeon you.

Level one is the world of Molluscs

## Mollusc Marauder Mayhem

Space Invaders was the first alien shoot'em-up in the arcade. The graphics were in black and white, so coloured strips of plastic were stuck on the screen for that colour effect. Sound familiar?

Big money! Get it while it's hot

### RUTHLESS

**O**K, it's professionally sanded down and varnished with some well turned effects, but I still don't feel the game reveals any true explosion of freshness to make it really stand out amid the foray of class blast'em-ups. Gameplay is fairly tame and the enemies too insubstantial to be worthy of remembrance. I like the music though. Sharon

Like a Jacques Cousteau deep sea expedition, schools of these weird looking critters from the deep become mortal enemies.

Despite the mono graphics and the drastic reduction in size, the sprites, whether they be fat screen-sized end-of-level beasts or even subtle little annoyances, are immensely clear.

An example is the multi-thorax worms which, when blasted, multiply into lots of smaller worms. Other similar beasts can be well and truly blasted into little chunks.

### All the conviction of a blast of Nashwan power.

All hell breaks loose as all manner of beasts relative to the era adopt bewildering attack patterns.

Assuming the role of bounty hunter-cum-mercenary, each and

every slaughter yields cash in the form of bubbles which must be collected while also maintaining your bastion.

The only solace is to dive into the local Galactic trader to tool up with weaponry. And what an arsenal it is!

Side shots and rear-shots powered up to three times, double-shot, homing missiles, awesome laser cannons that annihilate everything they come into contact with, not to mention the expensive but all-powerful Super Nashwan.

All toolled up and blasting some screen-sized enemy, you'll see there's hardly a murmur of complaint from the Game Boy, nor a noticeable glitch or wobble on screen.

Attack wave supersedes attack

wave, weakening your resolve and testing your reflexes to the limit.

Each beast becomes more spectacular than the last, not to mention more intelligent.

Gaining strength and force, evolution learns to adapt and put up a tough fight when faced with your aggressive presence.

# BOMB JACK

**Action that's hot enough to melt the buttons on your flameproof pyjamas, that's what the sizzling Bomb Jack is aiming for, once he's lit a fuse or two.**

By pressing up on the control pad with the 'A' button our Jack of all trades can do a superhuman leap

**S**imple arcade entertainment, thoughtfully implemented, works a treat within the framework of everyone's favourite digital dazzler. Bomb Jack, an accurate conversion of the popular coin op game, fits extremely snugly into this mould.

You assume the role of lilliputian Jack, a cross-eyed character with a taste for Superman-type garb. Swift and nimble in the air, he's got the art of flying – just throw yourself at the ground and miss – down to a T.

His task is to venture forth through a mammoth 60 levels of varying difficulty while lighting row after row of bombs as he does so.

**It is believed that Carter, Carnarvon and the team that first uncovered the tomb of the boy king Tutankhamun in the Valley of the Kings in Egypt were all victims of the 'mummy's curse'. They all died prematurely in mysterious circumstances.**

Rather than exploding in his face and producing a nasty char-grilled effect, the bombs then simply vanish and Jack receives a number of power balls, special bonuses or extra lives.

**Nudges you into addict mode.**

The infamous power ball will neutralise the evil-doers bopping about all over the place, thus allowing Jack to swat them out of existence.

Then is not the time to assume the world has begot a rosy hue though. Enemies have the ability to change their spots and adapt themselves so as to take Jack by complete surprise.

Skilful and dynamic flight paths are therefore required at all times by careful manipulation of the 'A' button. This enables Jack to jump and hover and also serves to stop or break his fall when required.

## Bombs Away

It is possible to remove any residue of real toughness by lighting the bombs randomly, fused or not, rather than tackling those that are already lit in a preset order.

Although it may make life easier, this method of approach does involve cheating a little.

It's a bit like saying you've reached the summit of a mountain but have used the cable car to get there.

**Jack hovers briefly, strains his neck to see if there are any unwanted visitors lurking, then sets out towards the lit fuses**

For a real challenge, make sure to abide by the rules.

The baddies speed up along their flight path and the whole caboodle becomes more frenzied the further into the game you get.

But no doubt you'll have become a whizz at flying by that time and may even wish to quicken Jack's moving

# ALIEN 3

***No one meant to do a sequel to Alien but Giger's awesome creations nurtured enough material for three movies and tons of licence related merchandise! We take an EXCLUSIVE look at Alien 3.***

**W**ell, it's been 13 years since Giger's awesome Alien creation burst out of John Hurt's stomach to begin a reign of terror never seen before in a movie.

Remorseless, unstoppable and certainly not the sort of character you'd take home to meet your folks, the Alien has slithered, slobbered and slavered its way through three films.

There really is no hiding place – Alien 3 is about to appear on a Game Boy near you. Designed by top licence game team BITS, the game is based on certain action sequences.

The emergency escape vehicle, an EEV, carrying Ripley, Hicks, Newt and the synthetic Bishop has crash-

landed on planet Fiorini Fury 161. Ripley is the only survivor. The colonists are all serious sexual offenders who have formed their own religious cult.

Ripley's presence causes quite a stir on the planet, but there is something even more sinister and sickening lurking in her stomach.

## **The Bitch is Back**

The game, played from an isometric perspective, begins at the point when Ripley realises that the EEV has brought the aliens with it.

The first to appear are the Facehuggers. Your primary objective is to destroy them. In this section the game adopts a scrolling platform shoot'em-up with you taking full control of Ripley.

Even on the little Game Boy screen, Giger's awesome alien is a fearsome sight

The labyrinthine network in the movie has been accurately mapped out in the game

An element of reasoning as well as quick fire blast action is required as you avoid the beasts and pick a path through a perilous environment.

At every step there are hazards requiring strategy. One particularly dangerous episode is a close shave with the massive ventilation fans.

These cause enough draft to suck a human into their massive blades, so lightning reflexes are needed to switch the fans and progress safely.

In the furor of battle, the shaven-headed one must unravel a series of puzzles essential to ridding the colony of the unstoppable alien.

Major objectives include the retrieval of the flight recorder from the wreckage of the EEV which contains information essential to the cause.

The inevitable confrontation with the queen Alien is being designed as the most competitive end-of-game confrontation ever produced.

BITS are approaching this licence project – presenting an interactive movie on the little yellow screen – with true professionalism. Such slick presentation is something that other designers will aspire to. **Jason.**

# SPY VS SPY

***Easily the best known spy world-wide is Bond, James Bond, and he a fictional character at that. The spies in this game have been adapted from MAD Magazine. Those familiar with said magazine will already know their history.***

***Among the actors considered for the part of James Bond before Sean Connery was chosen were Trevor Howard, Cary Grant, Richard Burton, Patrick McGeehan... and Roger Moore.***

***It's a shame you aren't carrying your Colt 45 today. If you had remembered it, this situation could be easily avoided***

White and Black, the characters here set out into the field again, eager to face each other for another battle. May the best spy win.

***Well, all that's left to say to save myself from sounding too much like a loser is "I didn't like the job anyway pal!"***

there are only the five documents and both of the spies have the same mission, it's every man for himself.

To collect the documents, the spy has to open one of the treasure chests. The only drawback is that if you don't manage to find the attache case first you can only carry one item.

If your opponent is carrying the case the only chance of getting it for yourself is to set a booby-trap and hope he walks into it.

## First Come, First Served

Traps can be placed just about anywhere and the display at the top of the screen will tell you exactly where one can be set.

The case will be replaced somewhere in the area. It's up to you to find it before the other guy does.

No, Spy Vs Spy isn't an easy

game in any respect and can become really frustrating if you let it get to you. One drawback is that you can easily forget where you have placed a trap and walk into it yourself!

If your traps don't seem to work, there is just one option left to you.

**B**ig Boss has been accusing both spies of not concentrating properly on their job in hand. Instead, they've both been setting booby-traps for each other to pass the time of day.

Time and time again they've been caught daydreaming and plotting on how to get their revenge on each other instead of doing the interesting work like filling out expense reports! What would you rather be doing?

The spies' superiors eventually came across a mission so dangerous and difficult that only a slim chance of survival is on the cards.

There are only two people alive who could possibly attempt this mission. Hopefully they'll both fail to return – permanently.

**Characters are impressive and easily identifiable.**

Out in the field, the pair have to collect five documents which can be hidden anywhere within the stage. As

# VS SPY

Yes, it's fisticuffs time. Easy to execute and very effective, you just have to locate the other chappie first.

As if all of this doesn't put you under enough pressure already, the whole game is set against the clock. This makes it sometimes seem nigh on impossible.

## Mission In Hand

Perseverance will pay off though and eventually you'll begin to advance through the missions.

Unlike some games, Spy will take ages to complete and plenty of skill, and occasionally a bit of luck will come in handy too.

The traps can be placed in the

**Quick! Don't allow the other guy to make good his escape with all the goodies. A few blows will make him lose everything he's collected**

trees, in the treasure chests or, if you get further on, in the thunder clouds.

At no time is there any way of knowing exactly where a trap has been placed so plenty of caution is also needed.

Just below the energy bar at the top of the screen is the indicator to let you know exactly how many items you and your opponent are carrying.

Once every item has been obtained you have to find the exit to the level before moving on to the next.

Pressing the select option shows you where everything of importance is situated. This will save you time so you don't run around aimlessly trying to find one of the items.

Luckily, the control system for the game as a whole isn't very complicated once you've played it a few times.

Nothing is either too difficult to use or understand and everything points to this becoming a very addictive game indeed.

Andy

## Live and Let Die

**Your boss doesn't look like too mean a guy, but cross him and you'll regret it**

**Use the map to locate each item of importance for the completion of the mission in hand**

**The large W on the ground allows you to warp to another part of the level**

**Once each item has been collected it's time to make your way out of one of the exits to the next level**

**If you keep your boss happy, he will always look this cheerful. He'll then brief you on your next mission**

## RAIN COAT

**I** didn't think it was possible to make a game where the only weapon is a multi-purpose broly. It's a welcome surprise to find that it isn't a complete flop all-round. Graphics are cute, sound is well above average and gameplay, although very samey, is good too. Not a classic game by any stretch of the imagination, but it did keep my attention.

*It may not seem likely, but the piano is your greatest enemy as it churns out more enemies at you*

**Unleashed onto a poor unsuspecting world, Parashooters makes its way on the crest of a wave to arrive onto the Game Boy screen - in time for Christmas I should add too.**

**H**ere we go one more time with the all-important story behind the game-type talk. In this case our fearless warrior goes by the not very macho name of Bub. He leads a simple and peaceful life with no real worries.

All this changed the day the evil Chaostikahn unleashed his monsters throughout the universe, quite obviously just out to cause trouble for everyone, everywhere.

Bub, being a decent kind of chap, decides to do the honourable thing and dispel this evil. He grabs his

magic parasol and then sets out to try and free the universe from the evil menace at large.

In each world Bub has to travel through seven levels, the last of which is host to an evil guardian who needs a severe kicking before moving to the next world.

## Doctor Foster...

Before reaching the guardians each preceding screen has to be cleared of all the monsters lurking there before the time expires.

To kill the beasts, they first have to be stunned using your parasol (in this instance a bit more dangerous

The stronger enemies may need a large droplet or one of their counterparts to be thrown at them before they die.

To collect a large droplet, just hold the fire button down and then keep the button pressed down while five other small drops are collected on the brolly.

When you feel like releasing it, let go of the button and watch the carnage it causes. There are loads of

different types of droplets, including the electrifying lightning drop and the scorching fire drop, each with their own personal effects.

If you fail to finish the level in time, a nasty bloke called Gaiko will promptly arrive on the scene. It's no use trying to escape him because, basically, it's life over!

There are plenty of bonuses to collect, some of which add to your bonus when the end of the level is reached. Other bonuses allow you to exit the level via a different opening.

Controlling Bub is quite simple after playing a few games and this adds to the overall enjoyment.

The end-of-level nasties, this one in particular, aren't nasty at all. A few shots and he's off to mummy

So, as you can see, life as a super hero isn't everything it's cracked up to be. It's not all fun and games with a little bit of work here and there.

Oh no siree, it's all go for Bub (I know just how he feels). There's no resting at any point in this game, which is just as well because it's not too bad at all.

Could you possibly save, not just our world, but the other worlds here? We'll have to wait and see. **Andy**

***The big news is that there's to be three more Star Wars movies planned over the next five years. In the meantime, the 'Force' could be with you on the bus, on the train... or wherever you play your Game Boy, as an exciting adventure game based on the first in the Star Wars trilogy is nearing completion.***

**G**eorge Lucas' fascination with interactive entertainment is more than just an idle passing fancy, although I'll bet a rye grin played about his lips on hearing that his cinematic spectacular Star Wars, is to be adapted on a tiny LCD screen.

Nevertheless, brave game design group, NMS, is adapting some of the spectacular action scenes from this box office smash onto the Game Boy.

The team freely admit that this project was a true labour of love. The first task was to watch the movie over and over to decide which scenes would make the best gameplay while re-tell the plot of the movie.

Lucasfilm provided a full specification and the entire authentic script and storyboard used in the making of the movie which helped the team decide on which scenes to use.

What has been achieved is noteworthy, indeed, an epic 22 levels featuring a variety of gameplay styles which take you from the Desert World of Tatooine at the beginning of the movie, to the stunning rebellion attack on the Death Star.

Here's the plot! Each scene has a series of objectives which have been designed to loosely mimic occurrences in the movie.

In the desert scene, Tatooine is the linking world displayed as an overhead-view with the player at the controls of a Landspeeder.

### **Real Bad Feelings**

Here you must make the first of many destined meetings and discoveries, your trusty old droid, R2D2. In subsequent levels you'll find Obe One Kenobi, Han Solo and the Millennium Falcon, as well as Luke's Light Sabre and shields for the Millennium Falcon.

Control is via the joypad as you steer the Landspeeder around natural desert obstacles and hazards, avoiding Banthas and Flying Mines and retaliating with a simple foremounted cannon, activated with the 'A' key.

On locating a Sandcrawler, the perspective changes to a side-view. Here the game takes on a more traditional side-scrolling shoot'em-up with trusty R2D2 as co-pilot.

Next it's the cave scene which was filmed in the Sahara desert, home of the Trogladites.

You must locate Ben Kenobi who will give you the Light Sabre and converse, giving crucial details concerning your objectives.

The journey continues to Mos Eisley Street where Han and Chewy are trying to get served in the bar. On foot, you must look for the Millennium

# Star Wars

**Onboard the Deathstar Luke and his buddies have to rescue Princess Leia who is about to be terminated**

Falcon which has been impounded, avoiding an attack from Stormtroopers and hungry bounty hunters.

Upon leaving Tatooine, the perspective changes to a 3D view for the next confrontation: an asteroid belt. Piloting the Millennium Falcon through the rain of rocks, the goal is to reach the Death Star Hangar.

Fighting off the Stormtroopers, the aim is to locate the Control room and the tractor beam which Han Solo must destroy.

### Just For Luck

Then, faced with a maze of corridors, map your way to Princess Leia's prison cell, fight your way back to Millennium Falcon, and then make good your escape.

The perspective reverts to the in-cockpit 3D view for a shoot-out with Vader's Tie Fighters fighters. The

epic attack on the Death Star takes an overhead perspective as you launch an assault on the Deathstar.

Adapting Star Wars on any machine is a tall order; recreating the plot on the GB is an amazing feat.

Nevertheless, NMS have kept faithful to the plot with enjoyable gameplay. Accompanied with a rendition of the original John Williams music score, this is a featureful movie licence to look forward to. **Jason**

After escaping Tatooine, the Millennium Falcon hits the asteroid belt once known as Alderaan, and now destroyed by the Empire

# Star Wars

Ridiculous as it may seem, in the early 1970s George Lucas just couldn't sell the idea of Star Wars to the money men in Hollywood. They all laughed at his 'fairy story in space'. The very idea of hairy Wookies and Jedi Knights seemed preposterous when you could make good money by having Burt Reynolds tearing around in a Pontiac.

With one low-budget movie called THX1138 under his belt, Lucas devised a script for a movie which would be cheap to make and yield a decent return – that was the cult hit American Graffiti.

Lucas was inspired by his good friend Steven Spielberg, who had used the revenue from the 1971 TV film Duel and Sugarland Express to launch Jaws, grossing \$98,470,000.

Lucas poured all the profits into the Star Wars project and remortgaged his home many times over. He was so sure that it would flop that he went into hiding.

He needn't have worried though, Star Wars made a net profit of \$164,765,000, the biggest box office smash to date.

# MAX

***More mayhem than can possibly be imagined is the main feature of Infogrames' Max. It's time for more interplanetary warfare everyone. Get those lasers ready, and let mass destruction begin.***

**At his side Max has his trusty plunger for that all-important climb to the higher platforms**

**T**he tried and thoroughly tested platform game is the most successful genre on the Game Boy. The folk at Infogrames have taken this as a starting point in order to create a platform romp with a curious twist.

Max opens up new avenues in the field of exploration as well as offering the player the traditional range of weapons and planets on which to do battle.

In all there are seven varying worlds with both smooth horizontal and vertical scroll. Each comes complete with its own array of evil monsters to fight against.

Your main enemy is a guy called

**Max begins the game with this rather impressive space age-type armour. He also begins with a pitiful excuse for a gun**

Draco who controls all the fast paced baddies throughout. Draco is such a threat to the galaxy that no one anywhere is safe.

Yep! He's not a very nice chappie at all. If there was no evil in the universe though, where would ideas for shoot'em-ups come from, that's what I want to know?

## Pray He's Still Out There

All this said, it will come as no surprise to learn that it's up to one guy to save the entire galaxy. It will also come as no surprise to discover that his name is none other than Max.

So, Max, an original character created specifically for this project, sets out to rid the galaxy of evil. Luckily he has a few special weapons

**Not Bygraves, nor Boyce, nor Mad, nor Headroom. Definitely not Wax and certainly not Schell. It's just plain and simple... Max**

and gadgets to help him. He begins with an armoured space-suit which will reduce in strength if he gets in the way of enemy bullets.

His arsenal, though not very impressive at the beginning, can be slowly built up to a quite phenomenal strength given time.

By far the most useful and innovative gadget that Max is able to carry is his telescopic sucker. This allows him to explore all the places situated above him.

In some of these areas extra weapons or power-ups can be found.

As with most platform games there are plenty of indestructible obstacles to pass

before reaching the guardians at the end of each planet.

Before trying to free one of the planets you're given the choice of exactly which world to enter first. It's then up to the player as to where Max will begin his quest.

Also, after a game is completed and Max has been defeated before saving the entire galaxy, a continue option will be offered.

The game has recently acquired its approval from Nintendo to go ahead with the official release and it should be available in February of 1993. One to look out for **Andy**

**Look out! It looks like there is a rather horrible nasty trying to slow Max down. A perfect opportunity to obliterate the opposition. Fire!**

## Poppies On Patrol!

To break through walls a hammer needs to be collected

Angled platforms allow you to bounce in only one direction

A Swedish chap named Palmquist bounced a soccer ball on his feet, legs and head non-stop for 14 hours, 14 mins.

# POP UP

**Does anyone remember Roger Hargreaves? The guy wrote loads of brilliant little stories about the Mr Men. One of my favourite characters among the lot was Mr Bounce, which brings me neatly onto the main subject of Pop Up – bouncing!**

**J**ust what popping up has to do with this game I will probably never find out in my entire life. The only thing I can think of that pops up is the toast from the toaster once it is sufficiently browned!

There is no cute character to speak of and no macho, muscle-bound Uzi-firing psycho. You are simply a ball bouncing from platform to platform. A strange concept I know, but there you go!

Making progress through each of the levels calls for you to collect each and every item from the screen.

There are many different

you've collected there is a column to the right of the playing screen which shows you every accumulated item.

This column is constantly updated. If you forget to look at it, it's possible to run out of items and be stuck on a level with no exit.

To gain a greater bonus, cover the area quickly. Once done, the exit will appear and you'll have to get back to it to make your departure.

## Boing!

Some levels house enemies. These can't be destroyed so all you can do is make sure you don't run into them.

With advancement, the more your brain will come in useful as tactics become of greater importance.

Each level uses a different

background from the beginning of the universe onwards. At the start a code is shown. Writing this down allows you to begin where you left off.

Graphics aren't too impressive. They aren't very clear and neither are they big enough.

You seem to spend a few seconds at the start of a new level trying to find where the ball is!

The controls are simple to use since there are so few moves to do. A high or low bounce is your lot, so make the most of what you've got.

If you can get your brain in gear and time everything right you'll be OK. This doesn't mean to say that this is simple though, far from it!

**Andy**

## SNAP CRACKLE

**A**t first, I wasn't too impressed with Pop Up. The graphics are plain, the tune isn't up to much and gameplay doesn't change nearly as much as it should. I like to see a new approach, but this does leave room for improvement. The idea is good though and the difficulty level high enough to keep you coming back for more.

**Andy**

**There's no hop, skip jump in this game. Just plain and simple bouncing from and to platforms**

The asteroid belt between Mars and Jupiter is widely believed to be all that remains of a planet that originally occupied the space and mysteriously exploded many millions of years ago.

As with the original Asteroids it's non-stop action all the way with no time to catch your breath throughout. Keep blasting away

## ROCKY

Asteroids is one of those timeless gems. Simplicity is the main feature of this conversion, both graphically and in gameplay. The game itself is a massive test of skill and speed which is where it comes into its own. Sometimes it was too difficult to make progress. All in all though this is as good a job as you can expect.

Andy

Look out! Being too trigger happy leaves you with the difficult task of trying to blast the tiny asteroids up. Take it easy on the fire button

For those people who haven't heard of Asteroids, if that is at all possible, it's one of the simplest games ever developed in the history of the universe.

Basically, all you do is blast your way out of a large group of asteroids. Each time a rock is hit it splits into several smaller pieces that also need to be destroyed.

Your space cruiser is only equipped with a few useful devices to assist in blowing your way free from the vast amount of shrapnel around.

You can either use the lasers to blast free or, if you get yourself hopelessly trapped, warp to another place in the area. Unfortunately the warp option will replace you in a random position, so there's no way of telling if you will reappear in even

more trouble than you were originally.

The only other option you can use is your ship's thrust. This is the most skilled part of the game as you try to guide the ship through the area without stupidly bumping into a piece of debris.

**One of those timeless gems.**

There are a few game options to make life that bit more interesting. If you find it all too easy, then alter the difficulty level and you'll notice the difference straight away. There are also options for a competition

or team play included.

One other obstacle to look out for is the UFO which does a fly past every now and then. Sometimes this can be a great help to you by blasting a few asteroids away.

Other times it will fire at you so it's up to the player to decide what to do about it.

Most of the classic games of the last 10 years or so have one thing in common - they're all simple ideas and challenging to play.

Asteroids was one of the first games I ever played and I thought it was absolutely the second best game ever (after Space Invaders).

Now though, it doesn't seem to be the challenge it once was. It's still better than a lot of the releases around today, so that can't be bad.

Throughout there is no

monotonous tune playing, just the basic sound effects such as the lasers and explosions.

This is in keeping with making this release as honest a conversion as possible, which is exactly what it is. As the old cliché goes, this is an oldie, but a goldie.

Andy

In a dazzling display of flying skills, a strange object flies past. Your doubts can be put behind you. As this frame shows, UFOs are real

# GAMING THE BITS

**BITS** have captured the sinister atmosphere of *Alien 3* on the small yellow screen

Quick, smooth scroll from an overhead perspective. **BITS** mapped the prison colony in the movie

**Big movie licences don't always make good games! However, for leading edge game design team BITS, big names and great games go hand in glove.**

**T**he calibre of Game Boy titles to **BITS'** credit is astounding by anyone's standard! They are masters of massive movie licences like *T2*, *Robin Hood*, *Prince of Thieves* and *Alien 3* as well as architects of the arcade blast *R-Type* and creators of cult comic 'marvel', *Spider-Man 2*.

Big names make great games as well thanks to **BITS'** skill, technology and ingenuity.

For too long, many licences were used to prop up lame games at the expense of game players.

**BITS'** first project was *R-Type* - a

gigantic task in every respect, it was a direct conversion from the graphically and sonically powerful coin-op.

Fou explains, "At the time, the Game Boy had hardly been stretched sonically or graphically and so we really were in uncharted territory."

## Flying High

The team started the project by formulating an engine which could smooth scroll screen-sized graphics with the minimum of flicker.

Then some poor sod set about the awesome task of mapping every single inch of this vast blast in order to portray a perfect version of the coin-op original.

*Terminator 2* - an explosive game with amazing variety

Features normally associated with 16-bit colour machines are neatly integrated

# VES AT TE

**A most amazing sprite animation doing Stan Lee's creation justice**

R-Type went on to win the Golden Joystick award. But there were many things that Fou and the team wanted to put in R-Type which they just didn't have the time to do.

Fortunately this has been redressed as they now put the finishing touches to the sequel R-Type 2, to be released in the new year.

Four years ago, Nebulus was heralded as one of the most original and innovative arcade concepts in recent years. BITS took on the Game Boy conversion called Castelian.

Fou says, "Castelian was one of the most difficult projects we've ever

done. The problem was caused by a technical idiosyncrasy on the GB which always centralises on the priority sprite. This caused hassle when we tried to get the columns in the tower to rotate individually.

"We achieved the effect with visual trickery which redraws the tower every frame, coupled with a 32k compression routine and the algorithm borrowed from the C64 version – a bit of a Frankenstein monster but it did the trick!"

BITS' first big movie licence coup was Terminator 2, the biggest grossing movie of all time with most spectacular and expensive effects.

A convincing Game Boy licence

seemed unlikely but BITS didn't hesitate! Fou explained, "The pressure was certainly on with T2!"

"Acclaim paid a King's ransom for the licence and they were obviously keen to recoup the money. We looked at both Terminator and T2 and decided to concentrate on the future scenes with the spectacular battles."

"Incorporating elements of the original movie turned out to be a legal minefield – we couldn't use any element or imagery from T1."

"That was only the tip of the iceberg! When we sent the sprite of Sarah Connor for the OK it was returned with a demand that certain changes be made. One in particular caused a

smile, it said simply 'breast reduction! Other alterations were a smaller nose and a fringe.

"Throughout the game, you will not see Annie's face – he insists on adjudicating imagery himself. I imagined this guttural voice booming down the phone that his ears were too big... we didn't bother!"

Spider-Man 2 was a real labour of love. The whole team was really inspired by the Marvel comic imagery and Spider-Man's agility represented a real animation challenge. Spider moves magnificently though.

Whether it be real-time adventuring or big movie licences BITS' dedication to stretching the capabilities of the Game Boy is unequalled.

## DYNABLAZER

Matthew Ker from Birmingham has supplied us with the following bundle of tips:

On game A, to get tons of dosh, type in the following codes:  
LLWRLWCW – 10,000 gold pieces and no cities destroyed.  
B?1RL1CW – 50,000 gold pieces and no cities destroyed.  
B?1RL2XW – 50,000 gold pieces. Windrid destroyed and flame pass obtained.  
44PP4P4P – end sequence.

## ADVENTURE ISLAND

If you throw axes everywhere, you'll be able to pinpoint hidden eggs which absorb your shots.

There is a warp egg hidden on Ferns area four. You'll find it two paces after the first rock in the second clearing where there are no trees in the background.

A strange look flower planted in the background means an enemy is about to ambush you from behind.

Thanks to Richard (Muppet) Eastwood for those.

## OPERATION C

**8**

On level four, if you shoot the twelfth alien rip-off, pulsing, exploding, egg-type thingy, you'll get a homing gun power-up. Be careful though, it's pretty tough to grab.

When at the top of the first set of platforms on level five, you'll come across another alien rip-off that doesn't jump out of its jar. Stand on the platform on the bottom left, then jump up and keep shooting it. You should then receive another homing gun power-up.

## GARGOYLE'S QUEST

**9**

To get to the final level, enter this code: KKKK KKKK.

## MOTOCROSS MANIACS

**10**

Don't use any nitros on course five except for when you need to get other ones.

Just before the third N capsule when you're going up the hill, keep frantically tapping down on the B button. The biker will then take off skywards and, lo and behold, 28 nitro cans will be awaiting collection.

## BATMAN

**11**

Should you want to access the sound test for this game, push UP and RIGHT and then START on the title screen.

## HYPER LODGE RUNNER

**12**

In order to reach levels higher than 16, enter the following password: QM-0388.

## THE CHESSMASTER

**13**

Now for a sure-fire way of beating the master and making it totally impossible to lose. When you play the castle, keep pressing A and your king will then disappear.

## PRINCE OF PERSIA

### TINY TOON ADVENTURES

**2** Of course you'd like to grab a few extra lives for yourself wouldn't you? Well, go to the second section of level one and then jump into the first inverted tree stump. Simple as that really.

### FACEBALL 2000

**3** As well as original 3D vector graphics, this game also boasts a number of warps. On level one you can warp to level 10 by shooting the wall opposite the exit once.

Alternatively, continue play up to level five Touch the Pod, and warp to level 71.

**4**

### TETRIS

Find Tetris far too easy? Want to speed it up a little? Well, here's your answer: Select game A and then go to the level select screen. Move to the level you want to start on, hold down A and press START.

**5**

### TEENAGE MUTANT NINJA TURTLES

If you'd like to play any of the three bonus games, simply go to the stage select screen and press both the A and B button at the same time. A question mark will appear on the menu. Select it and then press START.

**15**

### BART SIMPSON'S ESCAPE FROM CAMP DEADLY

To kill Blindsight Bill, leap over him and then throw the boomerang diagonally so that it hits him on the back of the head, thus defeating him with just the one attempt.

He'll then drop the candy which you have to pick up before walking to the right and jumping over the black pit. Lisa's waiting with a beekeeper's outfit for you to put on.

As for Rebound Rodney, defeat him by first of all throwing the boomerang away from him. Jump over Rodders so that the boomerang hits him squarely on its return journey.

Keep repeating this procedure and then move to the right to receive a football helmet from Lucy.

There'll be a radiation suit waiting for you once you've

defeated Slipshod Sammy. Keep hitting him with your boomerang to knock him backwards. Force him down into the black pit where he'll meet his doom.

Once you've made good your escape, Iron Fist has to be faced. Throw a good few boomerangs so that they bounce off him and smash the light bulbs hanging above you.

The screen will then go dark. Jump over Burns and move to the right. Climb up the ladder and jump up to hit the switch that says Do Not Touch.

You'll appear on a cliff top overlooking Camp Deadly. Walk to the right to emerge a very happy soul. The game will now be complete!

Jim Aparo and Mike DeCarlo

The first stage is split into three different sections, not including the final battle with the evil Dark Claw. The flooding sewers are a huge source of trouble for our main man.

The burst container tells you when the sewer will begin to flood. Leap up onto the higher of the two containers and jump as close to the roof as possible before using the grappling hook. The rising water will soon reach its peak and then subside again

1

2

Move quickly across and stand on the top of the staircase. The water won't reach you here, so just wait until it's safe to drop down onto the ground again

3

Go up the next container and wait for the water again, remembering to swing on the rope above the platform. Move down the staircase and you'll reach the most difficult part of this section

4

5

The second area gives you the chance to gain more Batarangs and get your energy back to maximum. It's only a small section but very important if you are to make progress

6

Move over to the right and then jump up to the top of the screen using the pipes. Leap across the top of these and try to swing across to the next pipe

7

Sometimes your hook seems to fail and you'll fall back to ground level. Persevere and eventually you will be able to jump across and collect the energy and Batarangs.

Walk off the left and swing across to the right again. Climb up the right to reach the next continue stage

# BA RETURN

Brian Bolland

Just one mistake and it's game over. The waterfalls will knock you down into the dirty waste below. Take your time leaping onto the platforms. After getting across, swing across the gap to reach the first continue point

# BATMAN OF THE JOKER

One of the most difficult games ever produced on the Game Boy is definitely Return Of The Joker. Luckily, our totally dedicated and hard working game players have come up with a guide to the opening stage...

## GAME BUSTERS PART 1

By far the most difficult section of the first stage with conveyor belts moving in different directions just to confuse you

8

9

Keep at the top of the screen and move across the conveyor belts to gain an extra energy bar. You'll need this at the end of the level

10

Straight after collecting the energy, fall to the ground again and be careful not to rush to the right, unless you want to be minced under a load of falling crates.

Wait until they've fallen and walk as close to them as you can get and fire your Batarangs at them

Jim Aparo and Mike DeCarlo

Swing across to bring your energy bar back up to the max by picking the energy item up

11

12

It's Doom For Dark Claw.

If you've managed to keep a few Batarangs, throw them at the Dark Claw to lower his energy. On the other hand, if you don't have any Batarangs, all-out attack is your best bet.

When Dark Claw jumps in the air, get as close to his landing point as possible. As soon as he lands, punch him as many times in quick succession as you can. Keep doing this and eventually Dark Claw will be no more

# THE A

Not yet managed to advance any further than The Ice Box in this mind-bending game? We tell you what to do and what to look out for and, more importantly, how to finish it...

## THE BOILER ROOM

After leaving The Ice Box, walk down the first and second staircases you come across. And hey presto, you will find yourself in the boiler room.

Go through the door with the

arrow above it and make your way along the pipes. Keep moving to the right, watch for the rats and collect the W potion.

Don't miss this; it will allow you to run twice as quickly as

normal and will be needed at the end of the level. The only worry is when it looks as if you can't move any further to the right.

Jump off the end. If you do it properly you will land on one of the two tiny ledges. It will take plenty of practice, but persevere.

Miss the ledge and it's life over. Once the end is reached go through the open door to greet the end-of-level nasty.

The guardian here is a real pain to kill. The easiest way is to stay on the top left and right platforms. Select the icicles you have collected from The Ice Box and fire these at the devil.

He will rush at you so time it right and leap across to the other platform. Keep doing this and you will soon be victorious.

## THE TOY BOX

The hot coals, given to you by Granny need to be saved for the guardian of the Toy Box. After leaving the boiler room, go back up the stairs and then go left to the next staircase up towards the attic.

Traverse the next four flights heading up to the right and then keep going right until you reach the far end of the room. Then enter the Toy Box.

Walk to the right, being careful not to touch the blades on the ceiling and the crumbling blocks, both of which are in abundance.

Try not to make a landing on the triangular things which bounce you skywards towards all the blades on the ceiling.

The oversized teddy bear carries a weapon which he spins around his head on a chain. Don't worry about this guy; just jump up onto the platform at the top of the screen and wait for him to walk beneath you.

Then fall to the ground again, select the hot coals and blast away. The teddy will be toast in no time (so to speak).

# ADDAMS FAMILY

## THE ATTIC

Walk to the left and keep going until you find the door which will now be open. Go inside. It's a synch to reach the top, just watch out for the seemingly endless flow of bats.

If you go up the left you will be able to collect the potion and restore your energy.

Once at the top of the attic you will go out onto the roof to do battle against Fester to help him

regain his memory. Force him into the lightning at the right side of the screen.

Use the icicles again, they seem to have more power than most other weapons. Whatever you do, don't get hit by one of his shots or you will turn to dust.

After the lightning has helped Fester to regain his memory, he'll tell you where Morticia is being held captive.

## DUNGEONS

Make your way down as far as you can go in the house and go to the right. A secret entrance will now be open. Go inside to get into the home stretch.

Before rescuing Morticia, you will have to go through the dungeons. This is the most hazardous area so be extremely cautious.

The main obstacles are the large ball and chain things that spin around. Leap across to the small platform in the middle and duck so that it passes over your head.

A moments' hesitation could cause you to fall onto the spikes or be hit by the ball and chain and then fall onto the spikes.

Also, be careful not to be hit by spikes that fall from the roof or walk into the guillotines. Get past all these and you can go through to face your final challenge.

## TORTURE CHAMBER

The final battle is surprisingly simple. Just fire an arrow at Tully and he will jump to avoid it. As he comes down again fire once more and you will hit him.

Jump over Tully's shots. Eventually he will be defeated and The Addams Family will regain the ownership of their home. If your ammo runs out, change your choice of weapon. And there you have it!

## Bad Flavour

**Yo what's popping Gee, While on the Bring The Noise tour with Anthrax earlier this year, I bought Terminator 2 because it looked 'bad', ya know what I'm saying.**

**The trouble is I can't suss out the order in which to destroy the generators. Ya gotta help me man, ya know what I'm saying. Word to ya mother, peeace! Flavour Flav Huxstable (Public Enemy), Compton.**

Brad: Yeeea boy, not the old generator problem. Here's the correct order in which to 'Shut 'em down'. Counting from left to right, destroy the generators in this order, 4th, 1st, 5th, 2nd, 3rd.

After the last tower run far right and you'll be confronted with a big end-of-level robot baddie which you shouldn't have to many problems with.

## Bubble Trouble

**Hi there gnarly dude, I've been buying your magazine from issue one and let me tell you, I lurve it. What I was wondering was whether or not you've played Bubble Bobble? (Have I played Bubble Bobble, tsk. What do you take me for?) Well I'm after some password for any level after 30. Chris 'Hardcore, you know the score' Quinlan, Glasgow.**

Brad: You really are quite sad, I'll wager you wear a gas mask and rub Vicks on your chest. Hmmm, anyway if you do find you can't progress, try these passwords. XGBF, 4TBF, GZBW and finally try round 94, 5ZBW.

## Money Matter

**Dear Brad, I had your address given to me from my secretary who believes you may be able to help me. Basically, I'd appreciate it if you could give me any pointers on how to get the value of the pound back up.**

**A worried N Lamont, Westminster.**

Brad: Hmmm, tricky one, that Norm'. After consulting my financial expert, Mr Cannon, he reckons the obvious answer is, of course to stay out of the Exchange Rate Mechanism, lower interest rates and stimulate the economy via investment.

Put new life into the property market and allow sterling to find its own level on the world currency markets.

This will lead to almost instant recovery, reduced unemployment and ultimately lead to a general utopia. Alternatively, you could try a cruise just off Tenerife. Either way, you'll cheer up a lot of Britons... especially Leon.

## Rhythm Method

**Hi there sexy, I've got a load of questions that I know you can help me with.**

1. Is there a level select on Super Mario Land?
  2. In Kung Fu Master I can reach Daddi Long Legs, but he always defeats me. What's my best form of attack?
  3. Which is the best character in the game Ghostbusters 2? My friend says that Ray is by far the best, is she right?
- I hope you answer my questions and**

## WRITE TO

**Brad's 'Now with wings' Q&A Page, GB Action, Europa House, Adlington Park, Macclesfield SK10 4NP.**

**keep up your fun/informative page to the high standards of the last issue. Danielle 'Jimi' Hendrix, Clayton.**

Brad: Thanks Danielle for your wonderful letter and constructive comments. As we all know it's nice to receive compliments. Down to business – the answers.

1. The good news is, yes. The bad news is that you can only access it once you have completed the game twice!

2. Yes he is a bit nasty isn't he? When you get within range, wait until he jumps up with a flying kick, back off slightly, then do a flip kick. Initially you may find this a bit difficult but once you've got your rhythm sorted out you'll have no

trouble whatsoever.

3. Strangely enough, they're all exactly the same and no character is stronger than any other, it's all down to personal preference. I always liked Dan Ackroyd myself. Now who did he play, hmmm?

## Incy, Winsy,

**Dear Supreme Being, Maybe you can help me, it's that game Spider-Man. I can get all the way to that leathery skinned bad guy, the Rhinoman on level four, but under no circumstances can I defeat the horned adversary. Can you help me?**

**Stan Carstain, Kings Cross, London.**

Brad: Yikes! In answer to your question, defeating the fat mammal/human combination is not really that difficult when you know how.

When you reach the dead end, face the monstrosity, then when he charges you, simply jump over him and hit him twice.

Repeat the process until he dies. Don't make the mistake of using your web because it doesn't do much damage at all.

# BUYER'S GUIDE

GBA 54  
NOV '92

**GB Action sifts through the growing pile of official Game Boy releases easily found in the high street, on the bus, in the living room, at the breakfast table, on the throne, and chooses the best of the bunch.**

**THE ADDAMS FAMILY**  
Ocean  
Platform romp  
£24.95  
1 player  
Released 1992

Platform movie antics with the strangest family this side of the grave (or is it the other side?). Ocean's third game on the Game Boy is a step in the right direction, being both fun and addictive. Gomez has to find the rest of the family, who have mysteriously disappeared. Although graphically not tremendous it is competent and cute, strange for a bunch of ghouls don't you think? Recommended to fans of Mario and the smash hit movie.

**THE AMAZING SPIDER-MAN 2**  
Acclaim  
Web'em-up  
£24.99  
1 player  
Released Oct 1992

The webbed wonder makes a welcome comeback in this fun and highly entertaining sequel. Six teasing and richly diverse levels take you around crime-ridden streets, have you rummaging inside the warehouse and lab and crawling down the sewers. Graphics are snappy and well presented and Spider-Man's huge range of antics, from wall crawling, web slinging and aerial kicking attacks, will appeal to any gamer looking for action.

**ADVENTURE ISLAND**  
Hudson Soft  
Platform romp  
£24.95  
1 player  
Released 1992

Adventure Island is a playable platform romp that'll keep you addicted right from the word go. Graphically the game is nothing more than average with fairly smooth scrolling and defined sprites. Sound can be a little nauseating at times but on the other hand gameplay helps to elevate it to a damn good and enjoyable platform romp.

**BART SIMPSON'S ESCAPE FROM CAMP DEADLY**  
Acclaim  
Platform adventure  
£25.00  
1 player  
Released 1992

Seldom does a decent game emerge from a cartoon licence, yet Escape from Camp Deadly turns out to be fun and addictive. You control Bart as he attempts to make his escape and rescue his sister Lisa from her predicament. Along the way you'll have to solve a few puzzles, plus put a stop to the evil doings of some nasty people, all of which adds up to an enjoyable release.

**BATMAN**  
Sunsoft  
Platform romp  
£25.00  
1 player  
Released 1991

Yet another platform game based upon a hit movie. Is the software industry aware of any other game style? However, all moaning aside, this really is a cracking little romp in which you take on the role of the Dark Knight himself and have the task of stopping the plans of the evil Joker. Great, but miniscule, graphics and generally absorbing gameplay take it to new heights.

**BART VS THE JUGGERNAUTS**  
Acclaim  
Action/puzzle  
£24.99  
1 player  
Released Oct 1992

Bart Simpson takes on the Juggernauts through a series of difficult events, each requiring great strategy, strength and skill. These include mastering the art of skateboarding, weightlifting and square hopping, plus the obligatory beat'em-up sequences. Some of the puzzles take patience to fathom out and it's a real pain starting from scratch again every time you fail, but you'll be returning time and again in a bid to get it just right. Totally different from Bart's earlier adventure, yet just as fun to play.

**BOULDER DASH**  
Sunsoft  
Arcade action  
£24.99  
1 player  
Released 1990

An all-time classic this one: puzzles, mazes and falling perils – what more could you ask for? The aim is to leg it around the place, avoiding rocks dropping on your head and collecting diamonds. When you've obtained enough, you then have to find the exit and leave. With hundreds of levels like this, you can't question the value, or can you?

**BUBBLE BOBBLE**  
Taito  
Platform romp  
£24.00  
1 player  
Released 1991

Bubble Bobble is arguably the definitive platform romp on any game machine. The Game Boy version emerges as being particularly

impressive. Unlike many other conversions the screen scrolls, but this is no major gripe since the action is still as exciting as ever. Graphics are generally OK and the sound is good, and although a tad annoying after a while, it is still the same as the coin-op! It's a shame it's not for two players, but a fun-packed cartridge all the same. First class.

**BUBBLE GHOST**  
Infogrames  
Puzzle game  
£20.00  
1 player  
Released 1991

Friendly ghosts are hard to find nowadays; Bubble Ghost is an exception. The aim of the game is to successfully guide a bubble through many hazardous screens by simply blowing it with your delicate breath. Difficult enough to keep even the most hardened of gamers busy for eons despite the fact that there are less than 50 screens. Pleasantly addictive and frustrating mindblowing fun as well.

**CAESAR'S PALACE**  
Ocean  
Gambling game  
£25.99  
1 player  
Released 1992

Beat that addiction with Ocean's remedy to the gambler's disease. Travel to Las Vegas without leaving home comforts. Whether you're a card player or a roulette fancier, every whim is catered for and implemented in such a way as to make it tremendously appealing. Games in this mould suffer from a lastability problem but it's still worth a look.

**CASTELIAN**  
Storm/The Sales Curve  
Arcade game  
£24.99  
1 player  
Released 1992

The hero of the piece is a frog by the name of Julius whose island has been surrounded by six alien towers. His task is to climb to the top of the rotating structures in order to place a bomb and destroy them. Simple and fuss-free gameplay is perfectly suited to the Game Boy, but don't think it's going to be an easy ride! It's nigh on impossible to avoid colliding with the

onslaught of meanies who'll send you plummeting to a watery grave. You'll need nerves of steel to make any real progress. You'll need a good memory, speed and plenty of skill and accuracy in this great long-term challenge.

**CASTLEVANIA ADVENTURE**  
Konami  
Platform adventure  
£24.95  
1 player  
Released 1991

If running around in battle armour whipping anyone who crosses your path is your idea of a good time, this could well be for you. Featuring some truly stunning visuals and atmospheric sound effects, witness one superior platform jaunt. Unfortunately the whole thing is a little on the short side with only four levels to play.

**CASTLEVANIA 2: BELMONT'S REVENGE**  
Konami  
Platform romp  
£24.99  
1 player  
Released 1992

There isn't much difference in the visuals department here from the graphics in the original game. This time around though there has been some fine tweaking on the gameplay side of things and the end result is very enjoyable. Neither are the levels too damn hard to complete and the inclusion of a level selector keeps you interested for longer than before. Belmont's Revenge is superb.

**DOUBLE DRAGON 3**  
Acclaim  
Beat'em-up  
£24.95  
1 or 2 players

**Released 1992**

Billy and Jimmy are back in what's their third confrontation against the dark oriental forces that cover the globe. This time the boys are searching for the three mysterious Rosetta Stones. As with previous games of the ilk, you'll spend all your time kicking and punching anyone who dares to walk the streets. Add to this the shops from which you can buy all manner of offensive weapons and you've got a fairly reasonable beat'em-up on your hands.

**DR FRANKEN Elite**  
Arcade adventure  
£24.99  
1 player  
Released Sept 1992

Ghoulish goings on see the loveable Dr Franken searching his Gothic castle in search of the severed bits of his long-time girlfriend (sic). There are around 100 spook-filled rooms to search, each packed to bursting point with all manner of marauding monsters. Gathering anything that isn't bolted down, Dr Franken must solve diabolical puzzles if he is ever to discover all the bits of his girl. Only when he has gathered all the pieces can he bring her back to life and live in eternal happiness.

**DUCK TALES**  
Capcom USA  
Platform romp  
£25.00  
1 player  
Released 1991

When the graphics, sound and gameplay on a piece of software are all of a well above average standard, then you may well guess that it is a worthwhile purchase to make. You take control over Scrooge McDuck as you endeavour to venture around level after level of fun and frolics. Things may initially seem a little bit on the easy side but it's best to view that as a challenge. Huey, Louie and Dewey also pop up as you move from one location to another.

**FACEBALL 2000**  
Bullet-Proof Software  
Maze/shoot'em-up  
£24.99  
1 to 4 players  
Released 1992

Faceball 2000 is Pacman in 3D. As a faceball you must travel around the labyrinth of corridors hunting down and zapping others of your kind. The fun really starts when up to four players compete. Chase each other at breakneck speeds and ultimately shoot to kill. What more could you possible want? It's action all the way and as you get better the challenge certainly gets tougher. Try out Faceball 2000 at all costs and, if possible, rope in your mates too!

**FERRARI GRAND PRIX CHALLENGE**  
Acclaim  
Racing simulator  
£24.99  
1 player  
Released Oct 1992

Your goal is to become the all-out winner of the Grand Prix World Championships as you race against 19 top international drivers on a selection of different courses around the world. Graphics are disappointing and car size has been reduced in favour of a superfluous backdrop. The thrills and spills of high-speed driving have not translated effectively to the GB screen and lack of trackside obstacles makes it more of a flop.

**F-1 RACE**  
Nintendo  
Racing simulator  
£29.95  
Up to 4 players  
Released 1992

Racing games are very popular both in the arcades and on home computers. F-1 Race is a fast paced racer, helped immensely by the presence of a four-player link-up option. The actual game is fast and furious despite becoming a little tedious when in one-player mode.

**FORTIFIED ZONE**  
Jaleco  
Shoot'em-up  
£19.95  
1 or 2 players  
Released 1991

Butch guy and girlie alien basher take on the world in this run-of-the-mill room to room blast'em-up. Dash around shooting anything that moves and then jump up and down on the power-ups to gain extra weapons and health boosts. Not bad, but no more than an adequate meanie mangler.

# BUYER'S GUIDE

**HOOK**  
Ocean  
Platform romp  
£25.99  
1 or 2 players  
Released 1992

If you've been disappointed by the movie, like so many, then the game from Ocean will redeem all. This is a platform romp of the highest quality, bound to have you addicted for months. Platform leaping isn't all it contains either as there are flying and beat'em-up sections as well. Controlling Peter Pan, the quest sees you trying to rescue your children from the clutches of Captain Hook. Great graphics and gameplay add up to one amazing treat...

**JEEP JAMBOREE**  
Gremlin  
Driving simulator  
£24.99  
1 or 2 players  
Released Oct 1992

Whether you happen to be a driving game freak or not, this comes highly recommended. Get behind the wheel of your jeep and prepare to burn rubber in a fast action and highly addictive race. The choice of courses on offer, each varying in difficulty, leave little room for boredom and the tracks create a realistic feel of the rough and tough of bumpy road racing. All you need do is concentrate on the tight corners, road side objects and other vehicles in your way. Brilliantly simple to play, an essential purchase to make.

**JORDAN VS BIRD: ONE ON ONE**  
Electronic Arts  
Sports simulator  
£24.99  
1 player  
Released 1992

Not a full-blown basketball sim, but rather a simple game involving one basket, one ball, and two players. But what players! You choose to be either Michael Jordan or Larry Bird and then challenge the other in a computer-controlled game of one on one. Although highly entertaining and possessing long lasting appeal, not all aspects of the game work as well as they might.

**KWIRK**  
Acclaim  
Puzzle game  
£14.95  
1 player  
Released 1992

A game where the central character is a fruit has got to be the strangest title ever (almost!) Either way, Kwirk is a fun, exciting puzzle game that will tease your brain to the full. Rotating blocks are the order of the day and it ain't all strange! It takes a minute to play but ages to master.

**MARIO TENNIS**  
Nintendo  
Sports simulator  
£20.00  
1 or 2 players  
Released 1989

Mario and Luigi battle it out with backhands, smashes and volleys in this highly enjoyable tennis tournament. With four levels to choose from, each more difficult than the last, skill and tactical thinking will be called for. Your opponent is no walk-over and you'll keep returning for more onslaughts in your bid to emerge victorious. It's fast paced with realistic ball and player movement and not something you'll easily tire of. Game, set and match to Mario.

**MEGA MAN**  
Capcom  
Platform romp  
£25.00  
1 player  
Released 1991

Mega Man is the new futuristic hero on your Game Boy and, as ever, he has appeared in a platform game. This is no ordinary release - it is damn addictive and brilliant to boot. The graphics are excellent and the gameplay just can't be faulted. Rush out and get it now, unless you happen to have done so already!

**METROID II**  
Nintendo  
Shoot'em-up/platform game  
£19.95  
1 player  
Released 1991

Nice, big, well-animated sprites dashing through nicely drawn scrolling scenarios killing things. Hmmm, well! There is good fast-paced violent action here, topped off with some really super-duper presentation. Check out the animation of the central sprite, surely the smoothest you're likely to see! But it isn't the best one ever written, so beware!

**MOTOCROSS MANIACS**  
Palmcom Software  
Racing game  
£19.95  
1 or 2 players  
Released 1991

Strange but somewhat addictive racing romp reminiscent of Kick Start, only this has much simpler stunts for you to attempt. The graphics aren't particularly stunning but they serve their purpose well enough. Eight levels is a bit on the short side for they can be beaten within a very short time of keen and dedicated playing. Nonetheless, a fun game that turns out to be somewhat of a challenge!

**MR DO!**  
Ocean  
Arcade adventure  
£25.99  
1 player  
Released 1992

Converted straight from the arcade machine to your Game Boy, Mr Do! follows the antics of the clown of the title as he collects fruit. Something seems to have gone amiss in the translation and sadly this version is not something you'll spend hours at a time playing. I can't put my finger on the problem since the game seems the same as the coin-op.

**NEMESIS**  
Konami  
Shoot'em-up  
£25.00  
1 player  
Released 1991

Nemesis is widely regarded as the best blasting game on the Game Boy, and quite rightly so, for the time being!

It is a fast action, addictive blast pulled straight out of the arcade and brought to your mono screen. Graphics, although small, are detailed and serve their purpose well enough.

**NINTENDO WORLD CUP**  
Nintendo  
Sports simulator  
£20.00  
1 player  
Released 1991

With my memory only able to remember two football games on the Game Boy, the other being Pro Soccer, World Cup is the worst so far! The side on view is OK at a push but the men on the field look more like overgrown animals than football players! A fairly average game.

**OPERATION C**  
Ultra Games  
Shoot'em-up  
£19.95  
1 player  
Released 1991

Excellent blasting game with two different styles of play that keep your interest throughout. The graphics are great with good looking backdrops and well drawn sprites. Difficulty is set just right and the end result is something well worth having in your collection.

**OTHELLO**  
Nintendo  
Board game  
£19.95  
1 or 2 players  
Released 1991

Othello is a good strategy board-game that most households will have at least seen at some time or other. This conversion is as good as you're likely to get on the Game Boy. Thankfully this is no mean thing and it is good to play and considerable fun in two-player mode as well!

**PACMAN**  
Namco  
Maze game  
£24.00  
1 player  
Released 1991

Games come and games go but few have the staying power of Pac-Man. It was one of the first releases ever and is still remembered today. See if the same can be said for Mario! The Game Boy version of this classic is every bit as fun to play as the original but it is a little bit slower and therefore a lot of people won't want to partake.

**PAPERBOY 2**  
Mindscape  
Arcade action  
£24.99  
1 or 2 players

**Released July 1992**

This wasn't a game that we were looking forward to since the original on which it is based isn't much cop. Thankfully we were wrong to make assumptions and Paperboy 2 is an incredible improvement over the original. Basically what we have here is more of the same but it has been programmed a lot better by the boffins at Mindscape. Recommended.

**PIT-FIGHTER**  
Toy Headquarters  
Beat'em-up  
£25.99  
1 player  
Released 1992

Originally an Atari coin-op, Pit-Fighter wowed audiences with its first class digitized graphics. Naturally, the humble Game Boy can't match the glorious graphics of its arcade counterpart but the programmers have certainly done an amazing job. The aim of the game is to earn money with your muscles alone. Assume the role of Buzz, Kato or Ty and take on a wealth of would-be challengers. Using your special moves you should be able to beat the first couple of contenders, but then things start to really hot up.

**Q BERT**  
Nintendo  
Puzzle game  
£24.95  
1 player  
Released 1991

Not much to this game. Leap about a 3D pyramid and land on each square to change the colour. And there's more. The obligatory hoards of meanies appear and as you advance through the levels things suddenly begin to get very hard indeed. Q-Bert is a conversion of a not very successful coin-op. Platform players might enjoy the challenge. However, if you persevere with it Q-Bert can soon become highly addictive.

**ROBOCOP**  
Ocean  
Shoot'em-up  
£25.99  
1 player  
Released 1991

Basically this game is a direct conversion of the Spectrum version which in turn was a direct conversion of the coin-op. Thankfully the 16-bit

abominations haven't been converted! You control Detroit's metallic lawman as he patrols the streets ridding the world of drugs and crime through, what else, brazen violence. It takes an acquired taste to learn to like this.

**REVENGE OF THE GATOR**  
Nintendo  
Bat 'n' Ball  
£19.95  
2 players  
Released 1991

A delightful and hugely addictive pinball game which comes with all the trimmings associated with the arcade counterpart. With five separate tables to scroll up and down, realistic, rapid ball motion, the obligatory buzzes and bells and a tremendous smattering of targets to knock out and bonuses to collect, you'll be onto a real gem of a game. A tilt hasn't been included but that can be easily overlooked since gameplay as a whole is quite superb. Not one to be missed.

**ROBOCOP 2**  
Ocean  
Platform romp  
£25.99  
1 or 2 players  
Released 1992

The first game wasn't particularly awe-inspiring and, to be honest, neither is the sequel although it is thankfully something of an improvement over the first. Once again you control Robo as he wipes out yet more drug dealers and upholds the law. However, good graphics and above average sound don't stop it from becoming very frustrating. The difficulty is set at a good level and it should at least be worth a look.

# BUYER'S GUIDE

## **SNEAKY SNAKES** Tradewest Platform romp £25.00 1 player Released 1992

Sneaky Snakes is not your typical platform romp, in fact the basic premise to the game is highly original. The aim is to eat as much as possible. At the end of each level there is a weighing machine and if the bell rings then you progress forever onwards. Fun and addictive, Sneaky Snakes seems set to be a neat little earner for Tradewest!

## **SNOOPY'S MAGIC SHOW** Kemco Puzzle game £24.99 1 or 2 players Released Sept 1992

You control Snoopy in this arcade-cum-puzzle game which offers excellent lasting appeal. You must save Woodstock who, like the bird brain he is, has gone and got lost. Snoopy must avoid a lethal bouncing ball, negotiate a maze and look for secret passages into the next zone.

## **SUPER HUNCHBACK** Ocean Platform romp £25.99 1 player Released Sept 1992

Not many releases reach this high standard on any machine but this is one you must own. It features some of the most humorous graphics you'll ever see on top of incredibly addictive gameplay, not to mention some terrific sound effects too. Rescuing Esmerelda is a task that every GB owner should take part in, rush and buy it now!

## **SUPER MARIO LAND** Nintendo Platform romp £19.95 1 player Released 1989

Released to coincide with the launch of the GB itself this is still regarded as the best in its genre. Mario is such a recognised character now that you needn't be told what is involved. If you don't own this one yet then you just can't comprehend what you've been missing out on. The only gripe in the whole product is that there is no continue option or password system to help you along. Still, who needs them?

## **SUPER RC PRO AM** Rare Racing simulator £24.95 1 player Released 1991

Few racing titles have ever reached the quality attained by Super RC, very few have ever used the graphical style. Viewed from a forced isometric perspective this game really is something special. If you are a fan of squeeling rubber and frantic bumper to bumper action then this is the best you're likely to get on the little grey box. Superb!

## **TEENAGE MUTANT NINJA TURTLES: THE FALL OF THE FOOT CLAN** Ultra Games Beat'em-up £24.95 1 player Released 1991

Now, none of us in the office have ever been great fans of the Turtles, yet we were prepared to give the

game a try. Sadly it lives up to all expectations and is not the type of thing we'd spend hours playing. The characters are recognisable and the whole thing is presented well, but gameplay is very bland indeed, rather like watching either of the two movies!

## **TERMINATOR 2** Acclaim Shoot'em-up £24.95 1 player Released 1992

Terminator 2 is a six stage shoot'em-up which takes you through time as both John Connor and the Terminator himself. Graphics are top-notch, although the first level is a little too complicated and things tend to get lost in the background. The variation between stages adds to the longevity with hours of fun gained from the tough task ahead. An excellent conversion of the smash-hit film, one to look out for.

## **WWF SUPERSTARS** Ljn Beat'em-up £25.99 1 or 2 players Released 1991

The latest craze to hit the teenagers in this country, thanks to the wonders of Sky TV, is the WWF Wrestling. This is the umpteenth computer version of the 'Sport' to hit the screens in the last year. All said and done though, none of these have been particularly excellent and this is no exception. Graphics are splendid, as is the sound, but it's sadly let down by a lack of moves to practise and perform.

## **WWF SUPERSTARS 2** Acclaim Beat'em-up £24.99 1 or 2 players Released Nov 1992

This draws and, in doing so, improves on its predecessor but is still basically a carbon copy of the first wrestling game. Be sure to think twice about purchasing them both. Graphics are faultless and the range of moves has been widened considerably to cater for more sustained gameplay. Definitely entertaining, but all said and done, grappling one opponent after the next can become slightly tedious.

# CLASSIC GAME

Did you know  
that all the  
planets in the  
Solar System  
could fit inside  
Jupiter?

# R-TYPE

**More splats than a squeezable bottle of ketchup can manage, more boldness than the USS Enterprise, that's R-type of game.**

**S**ucking hard on your boiled sweet and finger tentatively poised over the fire button, it's time to stop dilly-dallying. Overdrive mode beckons and hero status may be just a power pod away.

Your ultimate goal, single-handedly, is to defend the planet Earth from a somewhat trouble-some bunch of extra terrestrial mutants, sadly not of the Steven Spielberg cuddlesome variety.

The BYDO Empire has already consolidated its powerful forces and caused a frenzied whirlwind of chaos in the galaxy.

In your R-Type spaceship you must now launch a counter-attack, your goal being to defeat El Supremo and his five huge warlords.

Competing with any TV advert's dream car on the manoeuvrability front, simply blast every dreg of blood out of the enemies blocking your route to the end-of-level warlord.

Snipers clinging to both walls and

**It's time to  
stop dilly  
dallying now.**

## Lost in Space...

Of all the alien formations in all the galaxy it had to be this one! Is the lone space traveller fit to take on the rage of The Gladiator? About as moreish as a Sarah Lee sticky chocolate cake, R-Type is perfectly suited to a good binge or two.

ceilings and a vast range of baddies zoom into sight ready to experience a rather nasty splintering courtesy of a few rapid and well-timed taps of your 'A' button.

## R You Ready?

The lunar-type landscape forms its very own obstacle and you must weave your way through narrow passages while avoiding their serrated edges.

The power pods present an additional source of vitality for the lone pilot. The first shuttle destroyed will provide the pod.

This can then be placed on the front or back of your ship or even used as a shield.

By packing it off ahead it spreads out your fire, thus enlarging the target range and causing enough damage to feed anyone's taste for dominance.

Every POW shuttle that succumbs to the furious onslaught leaves behind a most conducive power item, be it a laser, a fire chain or a bouncing ball of energy, lethal to the touch.

All you need remember now is to sharpen your reflexes and fine tune your sense of urgency, timing and nimbleness in order to guide the craft through the rough and tough of galaxy travelling.

As for overall presentation, the horizontal screen scroll could maybe have been a little faster.

Notwithstanding, it's smooth and devoid of unnecessary flickers with big, bold graphics complimenting the overall beauty.

Shoot'em-ups abound with astonishing success on the small screen. Fuss-free, their appeal extends to a wide circle of gamers.

Although it could be argued that R-Type doesn't emerge as the definitive blast of its genre, its addictive appeal will ensure its light doesn't dim with the advent of more sophisticated games.

# Funk The GROOVE

**M**odern day movie stars, determined to make that leap from mega stardom to megaphonic stardom have scratched and blitzed their way (with surprising success) into the dazzling arena of music with the likes of Kim Basinger and Bruce Willis gracing the world with purry voices.

What, indeed, would civilization be like without

such body bopping melodies as 'I Should Be So Lucky' and 'Mona' produced, it would seem, by the entire cast of Neighbours? Let's not forget, of course, the infamous Neighbours theme tune too.

Now Mario has jumped on the bandwagon with a record destined to flip anyone's funkability button. Super Mario Land is where it's at...

**M**C Mario's had a rut with his best pal Luigi and has gone and teamed up with a pair of oil rig workers from Texas known as the Ambassadors of Funk.

Together they've been getting slick and, with more than a helping hand from producer Simon Harris, have been making a Super Mario Land record.

Is Nintendo's gaming icon's rise to multi-media stardom on target to become even more meteoric?

The Game Boy Mario tune has been run, jumped and mushroomed into a dance rap invincible ditto, destined for the hot spot in the charts.

Simon loves the Game Boy game to bits and has been playing it ever since its release back in 1989. He himself will don those famous red dungarees and play Mario for promotional reasons.

On the CD an additional track consisting of samples from the Game Boy tune is included, allowing game boy and girls to introduce their own lyrics and have a go at sampling for themselves.

And where is this new trend going to stop... well Simon's next best fave game is Streetfighter II on the Super NES. Look out for a new record sampled from said game soon...

NOV '92  
GBA 63

**I**t had to happen guys and gals! That terrific toe-tapping melody that accompanies that totally tessellating teaser Tetris has been popped into a neat tune.

This smashing new 45 is already climbing up the hip parade, pop pickers, and guess what, this happening bopper by Dr Spin was produced by tip-top West End musical meister Andrew Lloyd Webber, himself a huge fan of the Game Boy game.

An undisputed aficionado of today's rave scene, Andy has teamed up with producer Nigel Wright, the man behind the irrepressible hit, Itsy Bitsy Teeny Weeny Yellow Polka Dot Bikini, to turn the Game Boy plinky tune into a top tune. Groovy? Not 'arf!

## Batman Balls Up

**Q** Dear Jason, I just thought I'd put pen to paper to point out that while, on the whole, you produce a very sound magazine indeed, your research sometimes leaves a lot to be desired.

I refer, of course, to the birth of the Black Knight aka Bruce Wayne aka Batman. I find it hard to believe that in

**Q** Dear Ed, I've got a problem which is making me really question my friends' intelligence and judgement. I've just bought a Game Boy

and I think it's great but all my friends say I should have bought a Game Gear or Lynx because they've got better graphics, sound and a larger screen. I think gameplay is far more important than the quality of graphics. What's your opinion?  
**David Haldane, Victoria, Australia.**

**A** Although your mates take the mickey of your recent and discerning purchase I'll bet it doesn't stop them playing it! You

stick to your guns! If you want a hand held you can't beat the Game Boy for portability. Have you ever tried slipping a Lynx in your pocket?

As for economy, both the Lynx and Game Gear guzzle the old powercells like there's no tomorrow. Graphic and sonic quality is a sacrifice in order to fit the hand held criteria and, as you rightly say, it's gameplay that counts.

There have been far too many games that have relied on pretty graphics. Game designers haven't got any excuse with the GB.

We have a number of correspondents in Oz. Keep your letters coming in. It's handy to learn of the scene over there.

# Jason's Forum

November, (check out the review in this issue). Beetlejuice is a sound purchase and Robin Hood: Prince of Thieves, published by Mindscape in December should satisfy your thirst for Persia-like adventuring.

## Grey Day

**Q** Dear Jason, I keep hearing about 'grey imports' and I've noticed that these games are cheaper and new titles appear much quicker. Are these cartridges OK to use on my Game Boy.  
**Scott Kelsall, Mansfield, Notts.**

**A** Many games hit the shelves in the States and Japan before they are officially released by Nintendo in the UK. The price of games is also considerably less than in this country.

Grey importers buy the games in Japan and America and get them shipped over before Nintendo can release them officially. Although this practice is not technically illegal, you can imagine that Nintendo are a bit miffed about the situation.

Then again, they could stamp out the problem by making official releases more competitively priced and release games more quickly. Finally, yes it is OK to use grey import games on your Game Boy.

your review issue of the game based on the aforementioned super hero, you referred to Batman's first appearance as dated 1969 when in fact it was 1939 in issue 27 of 'Detective Comics'.  
**Dean Allen Jones, Miffed of Morriston.**

**A** If only you knew how many people have phoned, written and commented about this one silly mistake? Of course we

manfully except a sharp slap on the wrist for this carnal crime, although what's 30 years among friends?

I spoke to the reviewer in question who is claiming diminished responsibility - we have removed his little finger and sent it to his family!

I remember doing a review of Star Trek five years ago where I made a false reference to an event in one of the episodes, 'Trouble with Tribbles', so I can't talk!

All I can say is that we'll endeavour to check all statistics before putting them to print!

## Budget Blues

**Q** Dear Jason, Are Nintendo going to start a budget range? Many games I've seen reviewed

are certainly not worth £25.  
**Rhyss Bebb, Aberystworth.**

**A** Nintendo's policy is that while games are selling well at full price there is no point in releasing a budget range since this would be a sign that the market is beginning to die off.

I suppose that, eventually, a decrease in price is inevitable as new machines are launched, but it will be a long time before that happens.

## Nosy Parker

**Q** Dear Jason, Please could you answer a few questions? Apart from Duck Tales

and Super Mario Land what is the best platform game? When is Speedball 2 coming out? Is Beetlejuice any good? Are there any other adventures like Prince of Persia?  
**Nick Wood, Epping.**

**A** The Blues Brothers and The Viking Child are excellent platform games, Speedball 2 will be released in
